

Module 2 – Fundamentals of World Wide Web

(Part-2)

LAB EXERCISE

- ❖ Explain phases of SDLC life cycle.

Diagram :-

Explain :-

Stage-1: Planning and Requirement Analysis

- Planning is a crucial step in everything, just as in [software development](#).

Stage-2: Defining Requirements

- In this stage, all the requirements for the target software are specified.

Stage-3: Designing Architecture

- [SRS](#) is a reference for software designers to come up with the best architecture for the software.

Stage-4: Developing Product

- At this stage, the fundamental development of the product starts.

Stage-5: Product Testing and Integration

- After the development of the product, testing of the software is necessary to ensure its smooth execution.

Stage-6: Deployment and Maintenance of Products

- After detailed testing, the conclusive product is released in phases as per the organization's strategy.
